Professional Summary

Highly motivated training Fullstack Developer with experience in developing web applications. Enthusiastic about Java. Skilled in problem-solving, communication, and teamwork, with a strong ability to collaborate effectively within teams.

Technical Skills

Programming Languages: Java, JavaScript, HTML, CSS

Frameworks: Spring Boot, Angular, Bootstrap

Databases: MySQL

Tools: IntelliJ IDEA, Visual Studio Code, NetBeans

Operating Systems: Windows

Languages: Sinhala, English

Soft Skills

- Teamwork and collaboration
- Problem-solving and adaptability
- Communication skills

Education

Institute of Computer Engineering Technology (ICET)

ICET Certified Developer (ICD) Program (March 2024 – February 2025)

Lidekewery Educational Institute

NVQ (Level 3) Certification (February 2024 – June 2024)

Projects

Hotel Management System (POS Solution)

Developed a robust admin-only platform for hotel operations, including:

- Room booking and billing with secure payment processing.
- Generating simple bills for charges.
- Current status displayed using doughnut charts and bar charts.
- **Tech Stack:** Angular, Spring Boot, MySQL
- <https://github.com/YasinduP123/Hotel-Management-Backend-.git>
- <https://github.com/YasinduP123/Hotel-Frontend.git>

Clothify Shop (Store Management System)

Created a user-friendly retail management system with the following:

- Employee and role management for streamlined operations.
- Inventory and supplier management for effective stock control.
- Order management for tracking and updates.
- **Tech Stack:** Java, JavaFX, MySQL
- <https://github.com/YasinduP123/Clothify-Shop-Admin-Interface-.git>

Weather App

A real-time weather application featuring:

- Hour-by-hour weather status for the current day.
- Global location search for current weather status.
- Geo-location detection for the current and searched places.
- **Tech Stack:** HTML, CSS, JavaScript
- https://github.com/YasinduP123/Weather_app.git

Defend System

Developed a communication system with features such as:

- Interaction between components.
- Signal-based actions for predefined events.
- **Tech Stack:** Java
- https://github.com/YasinduP123/ICET_DEFEND_SYSTEM.git

Interests

- Exploring emerging technologies and software engineering trends.
- Watching movies and engaging in creative activities.
- Solving Rubik's Cube puzzles.
